3. Screenshots from API Client

Register

The screenshot shows the Thunder Client interface with a REST client request configured. The request is a POST to `http://localhost:8080/login`. The request body is a JSON object with the following structure:

```

{
  "username": "john.doe12@gmail.com",
  "password": "john.doe1234"
}

```

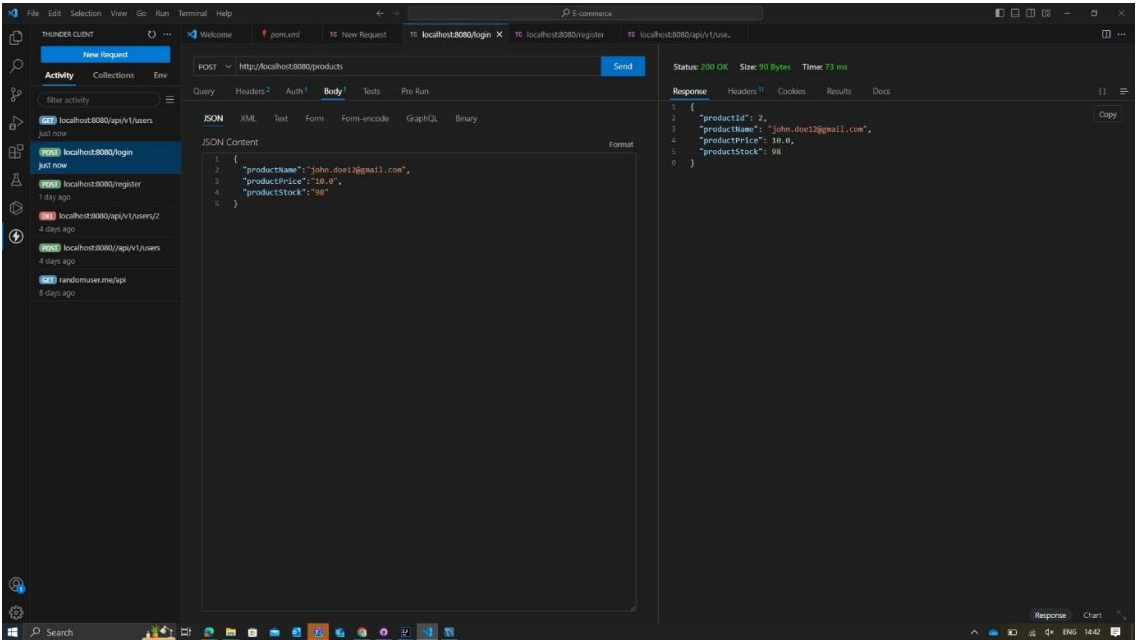

The response is a 200 OK status with a JSON body containing a 'jwtToken' and a 'message'.

```

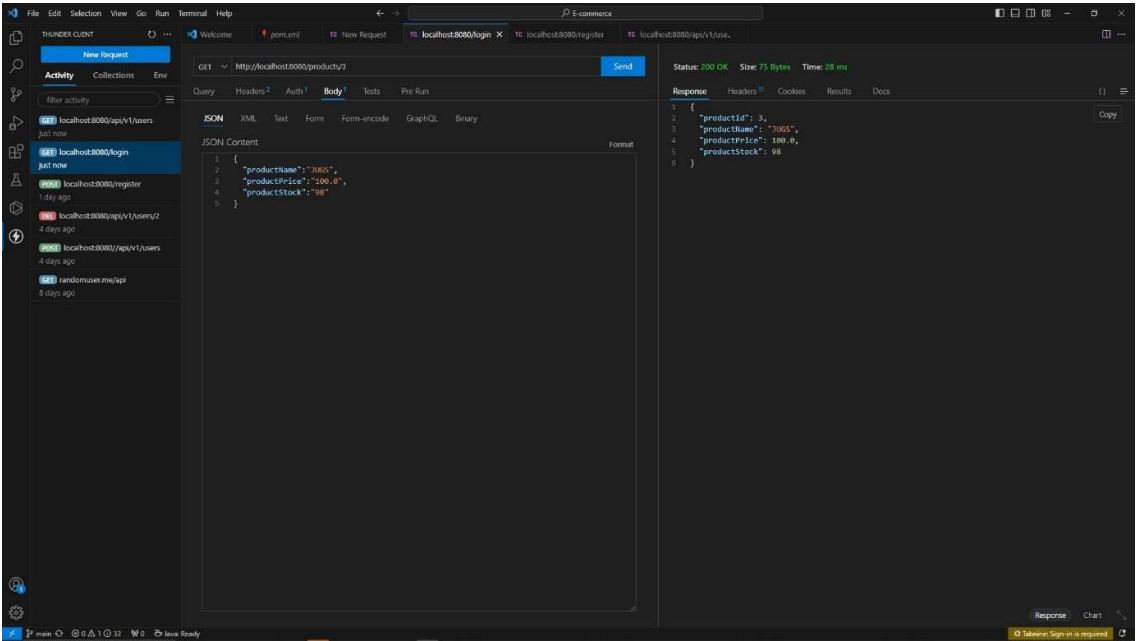

{
  "jwtToken": "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.eyJ1cm9mZiI6ImphbnkuZG91Z2@gmail.com",
  "message": "Token generated Successfully",
  "success": true,
  "email": "john.doe12@gmail.com",
  "role": "USER"
}

```
